

Professional labelling made easy

Durable Laminated Labelling

Brother's unique, patented TZ tapes are designed to be extra hard wearing. Tests have shown that they can withstand heavy abrasion, electrical resistance and lengthy exposure to chemicals, sunlight, water and extreme temperatures.

Brother laminated tapes consist of six layers of materials, resulting in a thin, extremely strong label. Characters formed with thermal transfer ink are actually printed onto the underside of the laminate. Sandwiched between two layers of PET (polyester film) this lets you create characters that are virtually indestructible.

Tapes for use with the P-touch 3600 model include 6 widths of tape in 21 colour combinations, helping you create professional self-adhesive labels and solving all your labelling requirements.

N.B Not all tape colours are available in all countries.

P-touch 3600 Special Features

- Multi-function cutter
- Rotate & print function
- Large semi-graphical LCD display
- USB connection (V1.1)

Printing capability

- 10 built-in fonts
- 24 (+auto) print sizes
- 18 print styles
- 583 symbols and clip arts
- 9 barcode types (stand alone) / 14 barcode types (P-touch Editor)
- Up to 27mm print height (36mm tape)
- Up to 16 lines (36mm tape)
- 20mm/sec. print speed
- 360dpi printing resolution for graphics
- 10,240 character memory (Max.100 Files)
- 30 frames and fill patterns
- Block function used for tabs
- Horizontal and vertical alignment
- Mirror, vertical and rotate printing
- Copy printing & numbering function
- Automatic power off
- LCD contrast setting

PC Software

- Supplied with P-touch Editor Software, enabling you to use additional graphic images & features, plus all of the fonts already installed in your computer.

Label options

Tape widths of 6, 9, 12, 18, 24 and 36mm
Standard tape length of 8m* (unless otherwise stated)

- Standard laminated tape (including fluorescent, matt and transparent tape)
- Iron on fabric tape
- Strong adhesive tape
- Flexible identification tape
- Tamper evident tape

*Providing approximately 100 labels (based on 10 characters & standard label length 8cm).

Included:

- User guide
- 24mm black character on white background TZ laminated tape
- P-touch Editor CD software
- USB cable
- AC adapter

The P-touch 3600 from Brother is an excellent stand alone or PC and Macintosh compatible Electronic Labeller.

With all the best P-touch printing functions it's the ideal machine to meet your labelling requirements.

Special features include the new multi-function cutter which is capable of printing labels consecutively - giving a string of labels that is half-cut and ready to peel easily.

Additionally, the new rotate and print function turns your information through 90° and repeats it to your pre-set label length.

With a print speed of 20mm per second and a print resolution of 360dpi, the P-touch 3600 produces excellent quality professional labels, helping you achieve a better organised working environment.

Ease of use

The navigation dial enables you to access all the software functions of the P-touch 3600 logically and quickly. The printing capability includes 10 in-built fonts, 18 print styles, and 24 print sizes (plus Auto). The large semi-graphical LCD display allows you to preview up to 20 characters on 3 lines. It also lets you preview the options for font, size, width, style, frames, alignment, margins & length and the new rotate & print function.

• Multi function cutter

The additional bonus of the P-touch 3600 cutter is that it can repeatedly half cut successively printed labels leaving one string of repeat-printed labels half-cut and ready to peel one after the other.

• Navigation dial

Provides ease of use and lets you access the main functions and editable features such as font, styles and sizes quickly.

• Large LCD Display

The large semi-graphical display provides on screen previews for font, size, width, style, frames, alignment, margins & length and NEW rotate print function - allowing you to view the different components of your label before you decide to print.

• USB connection

For ease of use the USB port offers time saving links for PC connection.

Barcodes

The in-built barcode function allows you to integrate 9 barcode types into your existing label information quickly and easily. Barcode options are easily accessible both through the menu and an additional shortcut key on the keyboard.

Memory Capability

The P-touch 3600 has the memory capability to remember text and formats, that way you can delete your label information, without losing the pre-set style that you have created. By selecting code and clear and then 'text only', the P-touch 3600 will cleverly remember the last format that was used even after turning off the machine.

Software Features

The PC/Mac compatible PT-3600 is supplied with:

- P-touch Editor - label editing software.
- P-touch Quick Editor - automatically formats selected text in other open applications to fit your chosen label size.

Also available is the new b-PAC SDK (software development kit). This is a software tool for Microsoft Windows that allows customised labels to be printed from within your own applications. b-PAC is available for free from www.brother.com.au

Logos & Graphics

When in use with a PC, the software enables you to import files such as company logos and photographic images into your label files. Bitmap, JPEG, TIFF, ICON and Windows Meta Files can all be imported into P-touch Editor and consequently printed onto a label. Teamed with the machines capability of printing at 360dpi - multitudes of diverse and professional labels can be created.

Printing Capability

The Printing capability of the P-touch 3600 is excellent - with a print speed of 20mm per second and a resolution of 360 dpi you have the convenience of producing professional quality labels instantly. And dependant on the width of label that you choose, it has the ability to print up to 16 lines of text.

27mm print height can be achieved with single line text on 36mm tape

Rotate and Print Function

This new function from Brother lets the user take the information that has been typed, and rotate it in order to repeat and print it along the width of the label. The machine automatically selects how many times the information can be printed by assessing the previously set block length and the current character size, it then re-formats the text to the tape width, before repeat printing the maximum amount of times within the set length.

Fonts

In addition to the fonts supplied with P-touch Editor, the software allows you to use all True Type fonts already installed in your computer.
